

Integrated 6U cases with UPS and
Drawer

Overview

The ultimate in small form factor Uninterruptible Power protection for the HPE Edgeline EL8000 Converged Edge Server System and related mission critical components. Online Double Conversion technology, providing the ultimate protection against the most problematic power source by isolating the load equipment from the utility power. The Double Online Conversion topology is the best for mission-critical applications, delivering a pure sine wave and zero transfer time.

Storage problems on-site? No more with the integrated 2U 18" sliding drawer. Suitable for small IT devices, cabling and related items.

Taking the Edgeline EL8000 into extreme environmental and operational conditions is now possible, a viable solution for Military, Federal, and Commercial sectors. The EL8000-MSC from Ultralife was custom designed to support the Edgeline EL8000 Converged Server System and enables edge computing in the most austere environments and locations.

Features

- ▶ **2000VA/1800W Online Double Conversion UPS**
- ▶ **2U Accessory Drawer, 18" deep**
- ▶ **9.5" Half Rack Mount aluminum case**
- ▶ **Designed for HPE Edgeline EL8000 Converged Servers**
