# EL8000-CA
## Edgeline Carry-Aboard Case

## Commercial case with integrated wheels and tow handle

## Overview

Enterprise class compute capability with wheels!

The EL8000-CA case is uniquely designed specifically for the HPE EL8000 Converged Edge Server System. Commercially transportable high-end Edge computing is now possible with airline compliant sizing requirements. At 9"x14"x22", the EL8000-CA will fit into the overhead space or under the seat of some aircraft (aircraft configuration dependent).

Once installed, the server is intended to operate from the case. The case lids are designed to be completely detachable, including the rear lid with the integrated wheels.

Lightweight design with integrated telescoping pull handle and roller bearing wheels make transporting and deploying the best Converged Server on the market a breeze.

## Features
